## Participants

## Notes

- Two goals for meeting with IDNR and Diamond Vogel next week:
  - Reach understanding on substantive site management decisions concerning:
    - Applicable boundary for achieving groundwater cleanup goals ("POC")
    - Need for enhancing institutional controls to prohibit use of contaminated on-site groundwater
  - > Will eventually need to resolve both issues if we're to achieve NPL deletion.
  - Rebuild trust and constructive relationship with both Diamond Vogel and IDNR
    - FYR process undermined trust, caused friction among parties
    - Reaffirm EPA's role as support agency to provide guidance to lead agency
    - Frame meeting as EPA listening, Mary's first involvement with players, what are their interests and desires? But must be careful about giving them false hope.
